1 Boards 2024 October Release

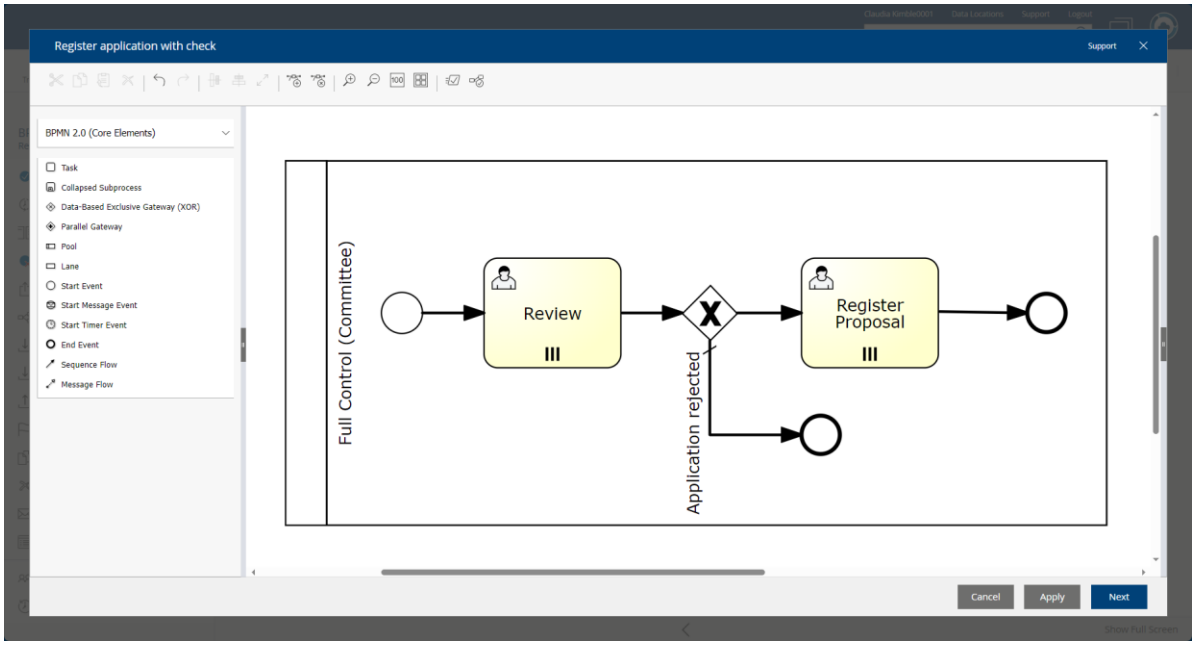
Find out more about new features and improvements in Boards.

1.1 Administrators

As administrators, you can expect the following new features.

1.1.1 Individual Definition of the Application Workflow via BPMN 2.0 Process Editor

With the latest release, we have introduced a significant enhancement for administrators. From now on, you can design and customize the application workflow using the BPMN 2.0 process editor. In the meeting management configuration settings, the corresponding process can be stored.



2 Boards 2024 September Release

Find out more about new features and improvements in Boards.

2.1 Administrators

As administrators, you can expect the following new features.

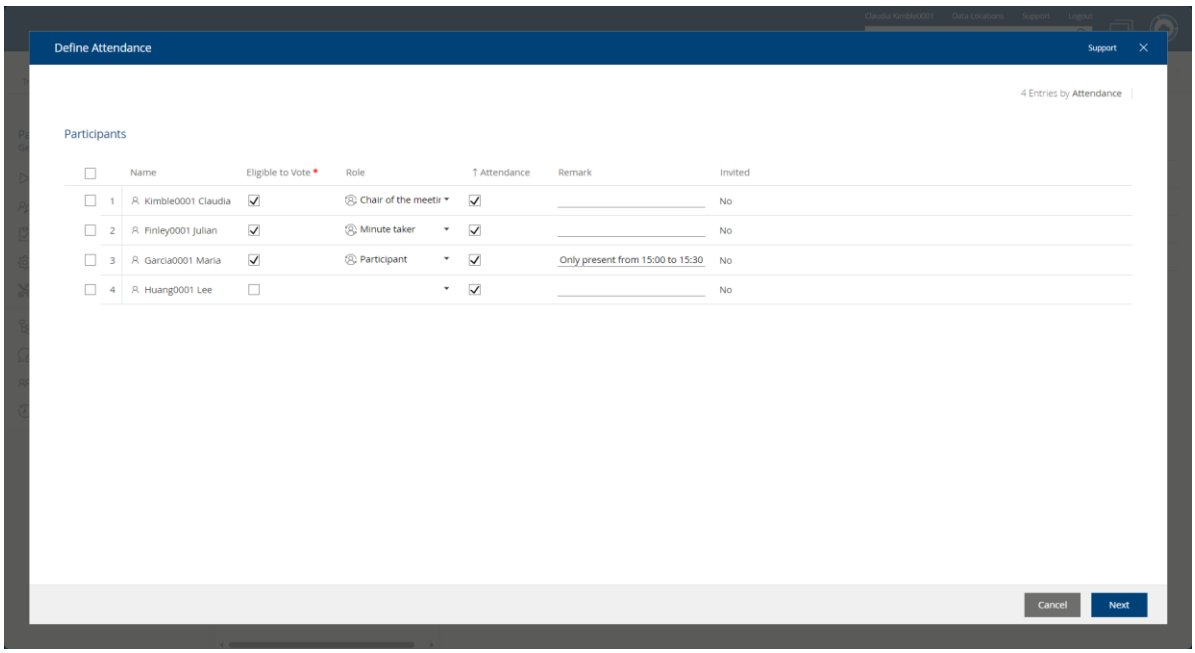
2.1.1 Assigning Member Roles

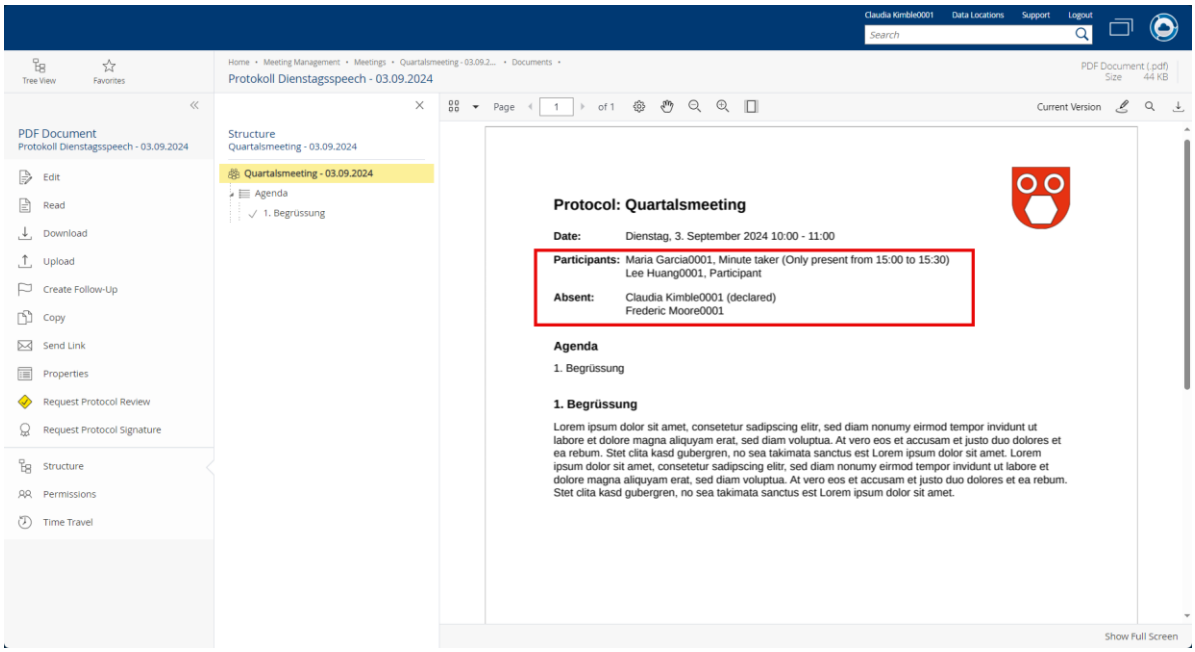
With the adjustment of permission roles, you now have the option to define custom, specific roles at the configuration level. These roles can be assigned to users for a specific board or meeting.

2.1.2 Defining Participation

For managing the meeting and determining member participation, you now have additional options. In a dedicated window, you can define voting rights, roles, and participation. Additionally,

there is a new comments field that can be filled with free text. The corresponding comments will be displayed in the meeting minutes.





3 Boards 2024 August Release

Find out more about new features and improvements in Boards.

3.1 Users

As an end user, you can expect the following new features.

3.1.1 Adding Document Links

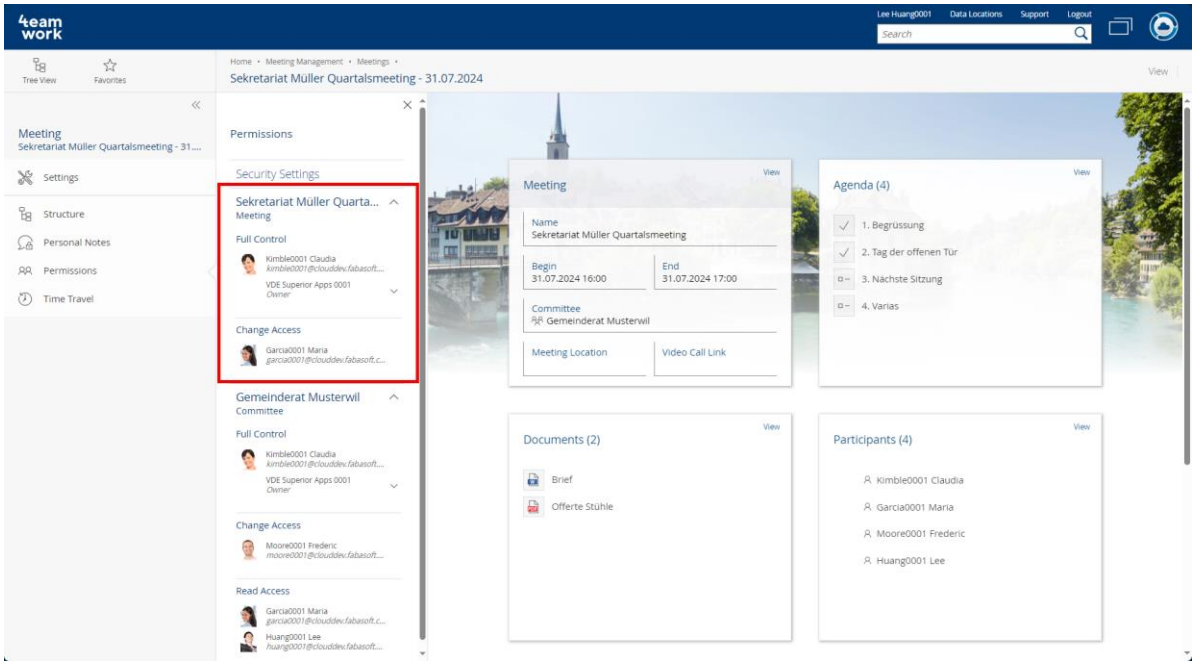
In the view of an agenda item, it is now possible to directly add a link to a document.

3.2 Administrators

As administrators, you can expect the following new features.

3.2.1 Change in Permission Roles

With the August release, the permission concept of Boards has been adjusted. There are now the PROCECO Cloud standard roles "Full Rights", "Edit Rights", and "Read Rights" at the committee and meeting level. The meetings inherit the permissions from the committee. However, specific permissions can be assigned in the meetings.



4 Boards 2024 July Release

Find out more about new features and improvements in Boards.

4.1 Users

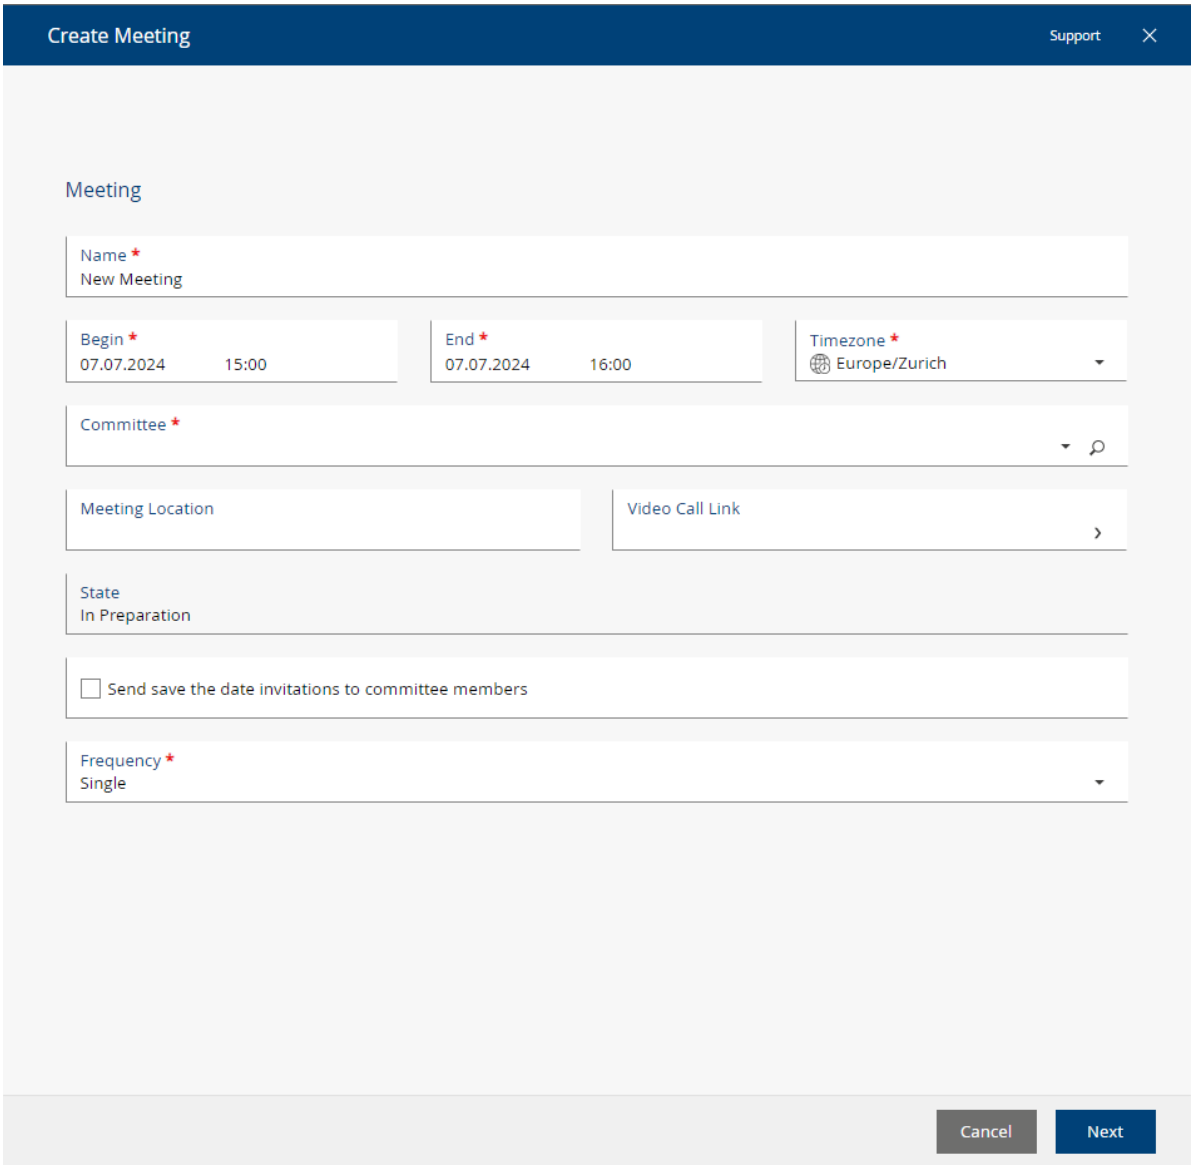
As an end user, you can expect the following new features.

4.1.1 Multiple recipients for a task

When creating a task, several recipients can now be selected directly. All selected recipients receive their own task in parallel.

4.1.2 Time Zone

When scheduling a new session, you now have the option to select the time zone. When participants are invited to the session, they will automatically receive the appointment at the correct time.



4.1.3 Calendar View

In the calendar view, appointments are now displayed according to the correct time zone. The time zone used on your client is applied for the display.

4.2 Administrators

As administrators, you can expect the following new features.

4.2.1 Deactivating committees

Committees that are no longer used can be deactivated via the setting for the respective committee. The committee is then no longer displayed on the dashboard. It is visible in the detailed list of all committees and can be filtered accordingly. New meetings can no longer be assigned to an inactive committee. However, meetings that are still open can still be held.

5 Boards 2024 April Release

Find out more about new features and improvements in Boards.

5.1 Users

As an end user, you can expect the following new features.

5.1.1 Requests

New request templates can be used.

5.1.2 Meetings

The function to create new meetings is now directly visible on the board dashboard.

5.2 Administrators

As administrators, you can expect the following new features.

5.2.1 Create Request Templates

In the session management configuration, you now have the option to create request templates. Additionally, you can assign a form category to the request templates, allowing you to specify unique form fields for each request template.
